GLACIER PHOTO PAPER COLDWHITE PE 200 GLOSSY

glossy 3369, 200 g/m²

Universal, PE-laminated, glossy photo paper with a cool white tint for poster and photo applications

This microporous-coated, double-sided PE-laminated photo paper with a glossy finish is suitable for indoor poster and photo applications and offers excellent value for money. The coating is optimized for water-based ink systems and enables fast drying. The prints impress with high color brilliance and a wide color gamut. The special cool white tint is ideal for portrait and neutral object prints.

Advantages

- Excellent color reproduction
- Cool white, neutral color
- High resolution and excellent edge sharpness
- High ink capacity
- FSC® certified

General tips

To ensure optimal product performance, the paper should be stored and used at a relative humidity of 30–65% and a temperature of 10–30°C. Lamination (hot or cold) is recommended to maintain consistent image quality over the long term, as catalytic processes triggered by components in the atmosphere break down the ink dyes over time (this does not apply to pigments).
