

VINCENT II CANVAS PLUS 380 SATIN

satin 3386, 380 g/m²

Universal, satin-finished canvas for framed art and photo applications

Vincent II Canvas Plus Satin is the successor and further development of our Vincent Canvas (3385). It is a universal artist's canvas made from a cotton-polyester blend (20% Cotton / 80% PET) , designed for solvent, latex, and UV ink systems. The satin finish enables excellent color reproduction. The coated surface shows no white break and is splash-resistant. The material was developed specifically for industrial, framed art, and photo applications and can be used without issue in automatic stretching machines. Compared to its predecessor, Vincent II is significantly more flexible and is woven with a robust 2:1 weave.

Technologies

Properties

Advantages

- Cotton-polyester blend
- Brilliant color reproduction
- Quick drying
- High flexibility
- 2:1 weave
- No white-scoring along the edges
- Splashwater proof

General tips

- Ideally, the material should be processed and stored in an environment with a relative humidity of 35 to 65% and a temperature of 10 to 30°C.
- Due to the natural properties of the material, the edges tend to curl upward in high humidity, which can damage the print head. Therefore, we recommend removing the material from its original packaging only shortly before use and starting the printing process immediately. Once finished, return the material to its original packaging immediately.
- When handling inkjet-coated materials, we recommend wearing cotton gloves to avoid fingerprints.

Physical data

Name	Value	Norm
Weight [g/m ²]	380	ISO 536
Thickness (total) [µm]	470	ISO 534
Opacity [%]	> 95 %	ISO 2471
