THE MARKET INNOVATION FOR TWIST AND FOLD WRAPS

ARTYSIO - the innovation for functional, print&pack on demand primary packaging in digital, aqueous inkjet printing.

The new ARTYSIO Twist film is ideal for twist & fold wrapping when small to medium runs are individualised, in high quality and with very fast delivery times. The printing system offers maximum flexibility: the film can be printed on site before packaging and processed directly in the line saving resources and enabling new distribution concepts.

The ARTYSIO Twist film provides reliable protection from light, air and dirt for sweets, chocolates and other confectionery. The white film can be printed individually using AQ inkjet for a great look and presentation to the customer. ARTYSIO Twist scores twice when it comes to environmental protection. The film is made from renewable raw materials and is industrially compostable.
