Sihl facestock earns multiple awards

By [STAFF WRITER](#) | [INDUSTRY UPDATES](#)

Picofilm O-60 White XM1 from Sihl's facestock range has received its seventh award for extreme requirements with a new certification to BS5609 section 3 for the HP PageWide.

Within the framework of the new GHS standards the product is suited for the labelling of hazardous goods transported by sea. It is characterized by its high resistance to abrasion and water.

0-60 white XM1 is now approved to BS 5609 section 3 for the HP PageWide for a total of seven types of printer and is thus resistant to seawater.

The Sihl facestock program offers a basis for identification labels that have to master all these challenges with thermal transfer, laser or inkjet printing.
